

ZEUS

- Semi-professional greenhouse with extra long glass panes.
- 5 sizes available (8.1m² to 15.7m²).
- Glass side panels and 10mm polycarbonate roof panels.
- Available in anodised aluminium.
- Integral base.

Designed for the passionate hobby gardener, this strong and beautiful greenhouse has an impressive eaves height of 1.89m (6'2"), offering an extraordinary amount of working space and the long pane float glass provides a particularly elegant appearance.

A lockable stable door equipped with strong fixings provides additional ventilation options without having to expose plants to cold drafts.

The polycarbonate roof minimises heat loss and reduces condensation.

NB – the extra strong Zeus frame means it can be installed directly onto a flat surface without a base plinth.

(*Anodisation is a process the aluminum goes through to keep it looking pristine throughout its life)

Zeus 15700
