Within this brochure we will share our expert advice and explain why you need a greenhouse, what to grow in your greenhouse, but most importantly when to grow it. If you are unsure of what to grow when - you’re not alone!

A greenhouse should be seen as a way of extending the growing seasons, creating a small micro climate of its own.

In the UK we are very restricted by the elements and unpredictable climate change. A greenhouse simply allows the gardener to shut the door on the weather and maintain those ‘perfect growing’ conditions.

A greenhouse enables us to grow fruit and veg which previously had to be overlooked because they would never survive.

Peaches, nectarines, grapes, not forgetting the old favourites, peppers, strawberries and even chilli plants all thrive in the warm conditions the greenhouse offers.

You can grow organically without the use of harmful chemicals and just think of the money you will save when growing your own produce.

There is always something you can grow in a greenhouse all year round.

**What sort of things can I grow?**

The beauty of a greenhouse is you are no longer restricted to what you can grow. The majority of fruit and vegetables not only grow, but thrive in the conditions a greenhouse offers.

Of course, you are not just limited to fruit and veg; a greenhouse can give you a head start on your spring flowers by planting them in the winter months.

Take a look at our “Growing Guide” at the back of this brochure which clearly sets out what to grow and when.

**Which greenhouse should I buy?**

As well as the practicality the greenhouse provides, the right greenhouse can be an attractive addition to any garden. A greenhouse which is well maintained can add an element of colour and interest to the garden.

Vitavia offer a full range of shapes and sizes in either natural green finish, traditional aluminium and some models are also available in black.

**Picking a greenhouse comes down to personal taste**

Curved eave models can add a touch of elegance to the garden whereas the traditional shape is always a favourite.

The size of the greenhouse determines the growing area which ultimately determines how much you can grow. If size is an issue, smaller alternatives to the greenhouse are available.

The Coldframe is a mini greenhouse which sits over your plants, or the Wall Gardens can offer you the chance to grow where space is limited.

**Vitavia offers the complete range**

From absolute beginner to accomplished professional, whatever type of gardener you are, Vitavia has something to suit you. From a Gaia cold frame, to many sizes of Ida wall garden, from greenhouses in many styles and sizes (6x4 to 8x20) to garden room styled greenhouses, we have it covered.
As the grow your own philosophy continues to gather momentum, there has never been a better time to buy a greenhouse.

With a wide range of quality products at affordable prices, suitable for every situation, Vitavia has become the first choice for gardeners when selecting their greenhouse.

A Vitavia greenhouse makes growing your own easy and every sale is backed by our total commitment to customer care.

The range has been developed by an expert team and our products are manufactured in the dedicated Vitavia factory under strict quality guidelines.

We have a network of retailers throughout the UK. To find your nearest retailer simply visit our website, alternatively you can phone or email us and our friendly customer services team will be happy to help.

Vitavia means ‘the way of life’ and for many people growing your own with Vitavia has become a very rewarding way of life.

KEY FEATURES

• Anodised aluminium frames
• Powder-coated green frames
• Powder-coated black frames
• Standard gutters and vents on all models
• Models approved by TÜV Standards Authority
• Corner plates and braces for added strength
• Strong reinforced boxes protect frame and bases in transit

*Anodised Aluminum surfaces are harder than Aluminum and have increased resistance to corrosion and wear which means your greenhouse will continue to retain its pristine appearance.

Vitavia has a policy of continuous product development, and reserve the right to alter specifications without notice.
The Venus – ideal for any gardener, the 1.93m (6’4”) wide Venus greenhouse is available in 5 sizes, to meet the needs of both the beginner and the experienced gardener.

There is a single sliding door which can be positioned to the left or the right and held in any desired position using the simple lever mechanism.

The Venus is equipped with 1 or 2 roof vents, depending on size and the structure has been strengthened with the inclusion of roof braces, with additional side braces in the Venus 7500.

The complete Vitavia range is available in both powder coated green or *anodised aluminium.

(*Anodisation is a process the aluminum goes through to keep it looking pristine throughout its life)

...ideal for any gardener...
The Apollo – from novice to expert. This greenhouse is available in 5 sizes to meet the needs of any gardener. Its design is based on the Venus with the added benefit of an integral base with a low threshold entrance for easy access.

There is a single sliding door which can be positioned to the left or the right. The Apollo is equipped with 1 or 2 roof vents, depending on size and the structure has been strengthened with the inclusion of roof braces, with additional side braces in the Apollo 7500.

The low threshold entrance distinguishes the Apollo from the Venus range. Not having to step over a perimeter base reduces any risk of tripping.

The Orion – available in 2 sizes, each 1.93m (6’4”) wide the Orion has attractive curved eaves for optimum growing height.

The two models have a smooth action sliding door, 1 roof vent and the Vitavia integral standard gutters.

As well as precisely cut glass, the Orion is supplied with u/v protected clear polycarbonate panels for the curved eave sections.

The complete Vitavia range is available in both powder coated green or *anodised aluminium.

The Saturn (Diana) – available in 5 sizes, each 2.57m (8’5”) wide, the Saturn (Diana) makes a real statement with its attractive curved eaves.

The five models in the range have double doors for increased access and the Vitavia integral standard gutters.

Depending on size, the Saturn (Diana) is equipped with up to 4 roof vents and, as well as precisely cut glass, is supplied with u/v protected clear polycarbonate panels for the curved eave sections.

The complete Vitavia range is available in both powder coated green or *anodised aluminium.

(*Anodisation is a process the aluminum goes through to keep it looking pristine throughout its life)
The Jupiter (Uranus) – Vitavia’s premium greenhouse is available in 4 sizes, each 2.57m (8’5”) wide with double doors. The Jupiter (Uranus) has an impressive eaves’ height of 1.51m (4’11”) offering increased headroom and working space.

Standard gutters are fitted, along with 2 - 4 roof vents depending on size. Additional strength is achieved by corner plates and braces throughout the building.

Jupiter greenhouses are available in powder coated green or anodised aluminium, and the larger two sizes (9900, 11500) are also available in powder coated black.

(*Anodisation is a process the aluminum goes through to keep it looking pristine throughout its life)
The Phoenix – premium low threshold greenhouse, available in 4 sizes, each 2.57m (8’5”) wide with double doors.

The Phoenix low threshold greenhouse has an impressive eaves’ height of 1.57m (5’15”) offering increased headroom and working space. Ridge height is 2.52m (8’3”).

The Low Threshold entrance provides easy access for wheelchairs and wheelbarrows. Standard gutters are fitted, along with 2 – 4 roof vents depending on size.

Additional strength is achieved by corner plates and braces throughout the building.

The Cassandra – designed for the discerning gardener who appreciates quality and aesthetics. It is supplied with full pane toughened glass throughout and the elegant bar capping, which secures the glass panes, adds a great finishing touch to this superior quality greenhouse. The low-level threshold gives unimpeded access.

Cassandra is available in two sizes: 9.9 m² (8’ x 12’) and 11.5 m² (8’ x 14’). Both sizes are available with powder coated black aluminium profiles.

Designed to sit on a single skin dwarf wall, the required height is 50cm, the dwarf wall increases the insulation of the greenhouse, and although the wall is not included with the greenhouse frame it enables the customer to choose the material which best suits their taste.

By absorbing heat in the daytime and releasing it at night, the dwarf wall reduces temperature fluctuations. This provides a more even temperature in the greenhouse around the clock, providing gentle growing conditions for crops in the greenhouse.

“...a dwarf wall increases the insulation of a greenhouse...”
The Neptune (Merkur) – a quality greenhouse, 2.57m (8'5") wide with a single, sliding door with a simple lever mechanism to hold it in any desired position.

Corner plates at both eaves and ridge, together with roof and side braces, give this building improved strength.

Available in 4 sizes and with higher eaves (1.35m/4'5") than usually associated with this type of greenhouse, the Neptune (Merkur) also has the Vitavia standard gutter.

The complete Vitavia range is available in both powder coated green or anodised aluminium*.

The Zeus – designed for the passionate hobby gardener, this strong and beautiful greenhouse has an impressive eaves height of 1.89m (6’2”), offering an extraordinary amount of working space and the long pane float glass provides a particularly elegant appearance.

This semi-professional greenhouse with extra-long glass panes is available in 5 sizes (8.1m² to 15.7m²) with 4mm float glass side panes and 10mm polycarbonate roof panes. It is available in anodised aluminium or powder coated black (extended delivery lead time) with an integral base.

A lockable stable door equipped with strong fixings provides additional ventilation options without having to expose plants to cold drafts. The polycarbonate roof minimises heat loss and reduces condensation.

NB – the extra strong Zeus frame means it can be installed directly onto a flat surface without a base plinth.

The Sirius 13000 – spacious ‘Orangery style’ greenhouse, beautifully designed with many fine features.

Lots of space for growing plants or just relaxing (or both!)

It offers an impressive eaves’ height of 1.57m and the glass is held securely in place with a new black rubber capping system.

A strong matching steel base and three downpipes are included as standard, as well as double doors and 4 roof vents.

Available in anodised aluminium or powder coated in green or black.

The Hera – an attractive garden room style greenhouse which will enhance the appearance of any garden.

Available in two sizes, the Hera offers either 4.5m² or 9.0m² of gardening or leisure space.

With an eaves’ height of 1.82m (6.0’) they are particularly suited to the taller gardener.

Both models look spectacular in either anodised aluminium or powder coated green.

The Hera 9000 has full length glass side panes and 6mm polycarbonate roof panels and is also available in powder coated black.

...will enhance the appearance of any garden...

...ideal place to escape...

(*Anodisation is a process the aluminum goes through to keep it looking pristine throughout its life)
The Aphrodite – made of very strong powder coated white aluminum profiles. It has a pent roof providing exceptional internal height throughout and plenty of room for growing and growers alike!

There are double sliding doors at the front ensuring easy and unobstructed access to the greenhouse. Ventilation is provided by 3 top-hinged side windows and 2 tilt windows over the doors.

The Aphrodite is glazed with 10 mm polycarbonate sheets in the roof and 3 mm toughened full pane glass in the front, sides and back. Rainwater downpipes are also included.

The *Ida* – a wall garden perfect for gardeners who have limited space available.

Designed for use on balconies, patios or walled gardens, these models are ideal for plants, seedlings and tomatoes.

Each of the three models has one roof vent and a high ridge to ensure easy access.

The Ida 900 and 1300 both have a single smooth action sliding door, whereas the Ida 3300 has front mounted double doors for increased access.

Prefabricated steel bases are available as an optional extra, as is a shelf set for the Ida 900 and 1300 which, comprising two shelves, substantially increases the growing area.

The complete Vitavia range is available in both powder coated green or *anodised aluminium*.

Three larger Ida models are also available. The new Ida’s are all 2m (6’) deep with 3 longer width options. Available in anodised aluminium*, the Ida’s have double doors which can be positioned in the front of the building or separated as single doors in both sides.

A lean-to sited against a sunny wall is ideal for keeping you and/or your plants warm long after sunset as the greenhouse retains the warmth from the wall during most of the evening.

All Ida’s come with 6mm polycarbonate roof panels

(*Anodisation is a process the aluminum goes through to keep it looking pristine throughout its life)

---

**HELENA**

The Helena – a conservatory is a style wall garden/greenhouse. The strong, tall and elegant anodised aluminium profiles allow in lots of daylight.

Large lockable double doors can be positioned in the sides or at the front.

It is glazed with full length glass side panels and 10mm polycarbonate roof panels, together with an integral base.

“... maximise your crop...”

“... dual purpose structure...”
The Gaia - A Cold Frame helps you grow and protect a surprising number of plants even in the smallest of areas.

A Cold Frame is effectively a ‘mini’ greenhouse, protecting seedlings and young plants from the vagaries of the changing climate and allowing you to over-winter established plants.

The Jumbo ‘Gaia’ Cold Frame provides additional growing height for your plants and is available with either 3mm horticultural or toughened glass, or with 4mm polycarbonate.

Like all Vitavia greenhouses, the Gaia Cold Frame is constructed from anodised aluminium, ensuring clean handling and a pristine finish.

• Bring stored Fuchsia Hydrangea and Dahlia into sunlight  
• Sow Tomato seeds  
• Sow Onions, Parsnips, Sprouts, Cabbage, Broad Beans, Peas and Aubergines  
• Pot up Strawberry runners  
• Sow Marigold seeds  
• Prick out Bedding Plant seedlings from last month and sow later seeds  
• Take Chrysanthemum and Fuchsia cuttings  
• Prick out Tomato seedlings  
• Sow Cucumber seeds  
• Sow Courgette, Celery, Sweet Corn, Runner Beans, Leeks and Peppers  
• Sow Marrow and Courgettes to plant out in May/June  
• Begin to harvest Strawberries  
• Re-pot and split some Houseplants |
| • Water more often, but make sure soil not overwatered  
• Check for frosty weather and keep temperature constant  
• Cover tender plants if necessary  
• Spray pests if necessary  
• Prepare seed trays  
• Sow Bedding Plant seeds  
• Bring stored Fuchsia Hydrangea and Dahlia into sunlight  
• Sow Tomato seeds  
• Sow Onions, Parsnips, Sprouts, Cabbage, Broad Beans, Peas and Aubergines  
• Pot up Strawberry runners  
• Sow Marigold seeds  
• Prick out Bedding Plant seedlings from last month and sow later seeds  
• Take Chrysanthemum and Fuchsia cuttings  
• Prick out Tomato seedlings  
• Sow Cucumber seeds  
• Sow Courgette, Celery, Sweet Corn, Runner Beans, Leeks and Peppers  
• Sow Marrow and Courgettes to plant out in May/June  
• Begin to harvest Strawberries  
• Re-pot and split some Houseplants |
| **MARCH** | • Keep temperature between 45°F and 65°F  
• Heat greenhouse at night and ventilate during day  
• Use liquid fertiliser for young plants  
• Watch for greenfly, whitefly and red spider mite and spray if necessary  
• Use capillary matting if beneficial for watering  
• Prepare hanging baskets  
• Prick out Bedding Plant seedlings from last month and sow later seeds  
• Take Chrysanthemum and Fuchsia cuttings  
• Prick out Tomato seedlings  
• Sow Cucumber seeds  
• Sow Courgette, Celery, Sweet Corn, Runner Beans, Leeks and Peppers  
• Sow Marrow and Courgettes to plant out in May/June  
• Begin to harvest Strawberries  
• Re-pot and split some Houseplants |
| • Keep temperature between 45°F and 70°F  
• Open roof vents  
• Use shading on sunny days, or cover seedlings with newspaper  
• Keep watching for pests Feed growing plants regularly  
• Use less heating and remove insulation  
• Prick out last month’s Bedding Plant seedlings and harden off  
• Plant out Dahlia cuttings, Pansies and Sweet Peas  
• Feed Tomatoes, pick out side shoots  
• Plant Cucumber plants into grow bags  
• Sow Marrow and Courgettes to plant out in May/June  
• Begin to harvest Strawberries  
• Re-pot and split some Houseplants |
### MAY
- Keep temperature below 80°F when sunny
- Use shading, especially on south facing glass
- Heating may still be required at night
- Open all ventilators if necessary and open door
- Damp down floors if weather sunny to cool and humidify greenhouse
- Feed and water plants regularly
- Pot up any cuttings which have rooted, ie. Fuschia
- Take cuttings from Houseplants
- Harden off Bedding Plants
- Make up Hanging Baskets and Tubs to put out in June
- Harden off Dahlia plants
- Train up Tomato and Cucumber plants, feed and water
- Harvest Lettuce, French Beans, Potatoes and Strawberries

### JUNE
- Stop using greenhouse heating - service and store heaters until winter
- Keep using shading as plants prone to scorching
- Keep temperature down by continued ventilation
- Feed and water plants regularly
- Damp down floors if weather sunny to cool and humidify greenhouse
- Move plants for garden out of greenhouse (harden off first)
- Clean and tidy up plant pots and trays
- Move Carnations and Chrysanthemum outside
- Move Hanging Baskets and Tubs outside
- Plant summer flowering Bedding Plants in garden
- Harvest early Tomatoes and Cucumbers
