## Glass plan for full pane toughened glass

Use plastic 'H' profiles for joining glass in gables and in assembling roof glass with perspex.

**NB:**The plastic 'H' profiles replace the Glass Retaining Clips 1012. Please note when fitting the 'H' strip the longest arm of the profile should be located inside and uppermost. It is also advisable to place a spring clip 1011 directly over the H strip at each end where the perspex joins the roof glass.
